

## News Release

### Novid Inc. and North Star Systems Inc. Expand Business Relationship

**June 19<sup>th</sup>, 2018 Rosenort Manitoba.** Novid Inc. and North Star Systems Inc. expand their business relationship to include the sale and distribution of Tattle Systems on flat bottom stationary liquid fertilizer tanks. Novid quality built tanks will now have the option to come with Tattle Systems or have Tattle Systems added to existing tanks. North Star Systems manufactures “Tattle” devices and develops the software for Tattle Systems, which provide a premier real time remote tank monitoring and data solution. “As the demand for remote monitoring and management of assets and inventory evolves, we felt partnering with a trusted tank manufacturer like Novid was important in adding value for farm and ag retail clients, said Curtis Kolibab, General Manager of North Star Systems. We are very pleased with this new business relationship between our two companies.”

“Novid is always looking for ways to add value back to its customer base” said Joel Brandt, Canadian Sales Manager for Novid Inc., “We have a long history of being innovators and leaders in our respective industry. Working with North Star Systems was a natural extension of that. We’ve really appreciated the visionary leadership that Curtis and his team have displayed through the development and launch of their exciting new product and we’re happy to help make this technology easier to access through our company” added Brandt.

#### **About Novid Inc.**

Novid is a leading North American manufacturer of liquid and dry fertilizer storage systems. Although Novid’s primary focus has been stainless steel production, they recently added a mild steel line of smooth wall dry storage systems. Novid has over twenty five years of building experience, a shop dedicated to stainless steel, and mild steel production, welders that are certified to the highest standards (Canadian Welders Bureau) and tanks that are manufactured with butt welded joints (more commonly associated with the oil industry). Novid’s desire to grow within the broader agricultural industry has also lead to the development of the Novi-Comp in vessel composter. Novi-Comp uses Novid’s decades of building and product development experience to help launch an innovative means of disposing of livestock mortalities.

### **About North Star Systems Inc.**

North Star Systems Inc. Head Office is Saskatoon, Saskatchewan Canada. The company was established in 2015 by Aaron Serhan who spent 29 years owning a full service independent crop input dealership. North Star Systems is a hardware and software developer. Tattle Systems maximize use of new innovative IoT and M2M technologies. Our focus is real time controlled remote monitoring for various liquid tanks and pressure vessels. We also offer customized solutions such as GPS tracking and dry product monitoring. Our products offer customers the ability to efficiently manage their operations and logistics in a more cost effective, safe and sustainable way. Tattle Systems are manufactured in Saskatoon and the company currently does business in Canada and the United States.
