TATTLE™ systems

Tattle Systems maximize IoT and M2M connectivity. Tattle devices, application and software are completely designed and produced in Canada by North Star Systems engineers. Tattle Systems work as a complete and closed system, connecting the device to the user through any smartphone, web app, or tablet from anywhere. The combination creates an innovative, real-time controlled and remote monitoring and data solution. Client's operations benefit from increased efficiencies, increased profitability, enhanced safety, sustainability and compliance when utilizing Tattle Systems.

BUSINESS SECTORS INCLUDE:
